

Teach your child to tell the time quicker than it takes to convert your kitchen clock to an Edinburgh Teaching Clock

Simply attach the Edinburgh Teaching Clock's clock face to your own kitchen clock and follow the 10 Easy Steps leaflet for teaching the time. Your child will pick up the concept in under 15 minutes and completely within 3 or 4 days at which point you can remove the Edinburgh Teaching Clock face from your kitchen clock.

See next page for the 10 Easy Steps to teaching the time using the Edinburgh Teaching Clock.

"I had an Edinburgh Teaching Clock once...

I SAT ON IT! Alright?!!"

Sorry the other pages are censored because the clock is so simple, having seen the preview you wouldn't need to buy it.
